

LP2 Pro

Level 2 Limb Protection

Mitigate Fear. Prevent Injury.

D30's dilatant materials are designed to absorb and dissipate energy in response to blunt force impact.

High levels of humidity are strongly linked to rider discomfort. The enhanced ventilation featured in the D30® LP2 Pro increases air passage and moisture flow from the body through the pad to maximise comfort in warm conditions, without sacrificing performance.

Building on the tri-ventilation technology used in the D30® LP1, which offered 45% improvement in breathability, the D30® LP2 Pro offers similar breathability and comfort while meeting the highest certified level of motorcycle protection.

Product Features

- Tri-ventilation for superior breathability
- CE certified to EN 1621-1:2012, Level 2, including optional cold and hot conditions
- UKCA Certified
- Type B coverage
- Manufactured in a highly durable material
- Temperature stable
- Pocketed integration
- Pre-curved
- Tapered edges
